Phone Number

613-894-5364

My objective is to continue my career into a more specific domain which is either print or web design. I've had a great passion for coding for many years but developed a recent joy creating magazine, posters, invites and more for print. I'm a dynamic team player and always willing to learn new software, applications, terms and businesses as well as meet new people in the process.

EDUCATION
